Star Surgical Mesh Plugs & Patches work best when the surrounding walls of tissue come in direct contact with a smooth wall of highly compliant mesh support material.

Unlike other pre-shaped plugs the Star Surgical Mesh plugs innovative, self expanding design maximizes surface contact and better conforms to the size and shape of the defect to fill it completely.

Preformed polypropylene mesh plugs & patches used for surgical treatment of groin hernias with anterior access.

Pre Shaped light weight PP meshes for hernia repair that is perfectly laser finished borders & with a channel for the spermatic cord.

We welcome new development designs in plugs /patches & suggestions to improve our existing products .We welcome OEM orders for bulk requirements.
